CÔNG ĐIỆN

Kính gửi: Bộ Nông nghiệp và Môi trường

Đại sứ quán Việt Nam tại Trung Quốc nhận được Thư mời của Ban tổ chức Hội nghị Chuỗi cung ứng ngành Thủy sản Châu Á Thái Bình dương 2026 (APSIC), mời đại diện Bộ Nông nghiệp và Môi trường tham dự APSIC được tổ chức tại Tp. Hải Khẩu, tỉnh Hải Nam, Trung Quốc từ ngày 20 - 22/10/2026.

Đại sứ quán Việt Nam tại Trung Quốc xin chuyển Thư mời kèm theo để Quý Bộ biết, cử cán bộ đăng ký tham dự và triển khai các công tác liên quan.

Trân trọng cảm ơn sự phối hợp của Quý Bộ./.

Nơi nhận:

- Như trên;
- Văn phòng Bộ; Phòng Hành chính;
- Cục TS và KN; Vụ HTQT Bộ NN và MT (để phối hợp);
- Vụ ĐBA, Bộ Ngoại giao (để biết);
- Vụ TTNN, Cục XNK, Bộ Công Thương (để biết);
- Lưu: Văn thư ĐSQ.

2026亚太（海南）海产业供应链大会组委会

亚海组办〔2026〕010号

Invitation to Attend the 2026 Asia-Pacific (Hainan) Seafood Industry Supply Chain Conference (APSIC)

Dear Ministry of Agriculture and Environment of Viet Nam,

The global seafood industry is currently undergoing a significant transformation, shifting from scale-driven growth toward value creation and from resource dependence toward technology and innovation-driven development. The Asia-Pacific region accounts for approximately 54% of global fisheries production, while aquaculture and marine fisheries are playing an increasingly strategic role in ensuring regional food security and advancing the blue economy. With emerging technologies such as the Internet of Things, big data, artificial intelligence, and biotechnology becoming increasingly integrated into the industry value chain, the seafood industry is rapidly moving toward digitalization, intelligent transformation, green development, and higher value-added production. The resilience and sustainability of blue food systems have consequently become important issues of global concern. At the same time, multiple factors—including competition for genetic resources and breeding technologies, fluctuations in feed and protein ingredient costs, disease and biosecurity risks, environmental constraints, and the restructuring of international trade rules—are converging, bringing the global seafood industry supply chain into a new stage of profound adjustment and restructuring.

The year 2026 marks the first year of island-wide customs closure operations in the Hainan Free Trade Port. With policies such as “Zero Tariff” and tariff exemption for goods meeting the 30% value-added processing requirement working in synergy with the regional accumulation rules under RCEP, Hainan's institutional advantages in cross-border factor flows, trade facilitation, value-added processing, and regional industrial cooperation are expected to be further strengthened. These developments will provide a new strategic platform for attracting seafood industry resources from across the Asia-Pacific region, promoting supply chain collaboration, and expanding international cooperation in the blue economy. Leveraging the geographic and policy advantages of the Hainan Free Trade Port, further strengthening connections between Hainan and the Asia-Pacific's marine fisheries, aquaculture, breeding, processing, cold-chain logistics, and seafood trade systems is of significant practical importance and offers substantial development potential.

Against this background, with the approval of the Hainan Provincial Government, the **2026 Asia-Pacific (Hainan) Seafood Industry Supply Chain Conference (APSIC)** will be held from **October 20 to 22, 2026**, in Haikou, Hainan Province, and has been included among **Hainan Province's key exhibition and conference projects for 2026**.

Under the theme “**Blue Granary, Hainan Sets Sail**,” the Conference will focus on key areas including blue aquaculture breeding, smart fisheries, blue food systems, aquatic feed and alternative protein sources, shrimp industry transformation, seafood processing, and cold-chain logistics. It will explore cutting-edge topics such as marine science and technology innovation and industrial integration, modern aquaculture breeding, smart fisheries, green aquaculture, marine food technology, and seafood industry supply chain collaboration.

The Conference will bring together representatives from government agencies, international organizations, research institutions, industry associations, and leading enterprises from China and abroad, providing a high-level platform for academic exchange, strategic dialogue, and industrial cooperation in the Asia-Pacific seafood industry. It aims to strengthen the connection between technological innovation and industrial demand and to contribute new ideas and practical solutions to the innovation and sustainable development of global seafood industry supply chains.

We highly regard your distinguished leadership as **CEO of JBS China**, where you oversee the China operations of one of the world's largest animal protein companies. With extensive practical experience and outstanding achievements in meat and food industry supply chain management, international trade, and cold-chain logistics, your leadership has contributed to JBS's continued engagement with and development in the Chinese market, as well as its commitment to providing high-quality animal protein products to Chinese consumers.

Your strategic vision and extensive experience in global meat supply chain operations, food safety management, and international market development closely align with the Conference's key areas of discussion, particularly **seafood processing and cold-chain logistics, food supply chain collaboration, international trade, and cross-border industry cooperation**. We believe your insights and experience would bring valuable perspectives to the discussions at APSIC.

The Organizing Committee of APSIC cordially invites you to attend the Conference, participate in the **Opening Ceremony and Plenary Session**, and, according to your professional expertise and areas of interest, take part in relevant thematic forums, expert exchanges, high-level dialogues, and industry cooperation activities during the Conference.

Opening Ceremony and Plenary Session

Date: October 21, 2026 (Wednesday), 09:00–12:30

Venue: Hainan International Convention and Exhibition Center, Haikou, Hainan, China

The Organizing Committee will recommend and coordinate suitable thematic sessions and speaking opportunities based on your professional expertise, areas of interest, and participation preferences. Detailed forum arrangements, speaking opportunities, and the overall schedule will be further communicated and confirmed with you.

A dedicated member of the Organizing Committee will be assigned to coordinate your participation and provide assistance with transportation, accommodation, and other conference arrangements.

We sincerely hope that you will be able to make time to attend this important event. We would appreciate it if you could return the **Participation Confirmation Form by August 31, 2026**, to facilitate the Organizing Committee's overall arrangements for your participation and hospitality.

We look forward to welcoming you to Haikou and to your valuable contribution to the success of APSIC.

Yours sincerely,

Secretariat of the Organizing Committee, APSIC

Mr. Tang Guodong
